

Support & Resistance, On One Sheet

The working rules from the full course, with the three charts that matter. Print both pages and keep them beside the platform.

HOW TO DRAW THE ZONE

The wick-to-body method. The zone spans from the extreme of the rejection wicks to the edge of the candle bodies — where price probed, and where it was accepted.

THE SIX RULES

- 1 Levels are zones, not lines**
Price doesn't respect a number to the pip. Draw a band a few pips wide and treat everything inside it as 'at the level'.
- 2 Fewer levels, more meaning**
Nine lines on a chart means none of them matter. Keep the two or three levels price has respected repeatedly — delete the rest.
- 3 Touches build the case**
Twice is a suspicion. Three or more times, across sessions, is a level worth planning around.
- 4 Role reversal is the tell**
Broken support acts as resistance on the retest, and vice versa — often the cleaner entry than the break itself.
- 5 Higher timeframe first**
Weekly outranks daily outranks intraday. Draw top-down, then trade the small chart inside the big chart's map.
- 6 The reaction is the information**
A level predicts nothing. What price DOES at the level — rejection, stall, clean break — is the signal. Wait for it.

THE PATTERN THAT PAYS — ROLE REVERSAL

Floor becomes ceiling. Support breaks with conviction, the pullback into its underside is sold. The retest is the entry; the zone's far side is the invalidation.

THE TRAP TO SURVIVE — THE STOP-RUN

The dip below the obvious level converts resting stops into forced selling — then reverses. The close back above the zone is the tell; the wick is the trap.

THE THREE WAYS TRADERS DONATE MONEY AT LEVELS

No level, no trade

If you can't say which level the idea is built on, there is no idea.

Stops go beyond the zone

A stop inside the zone is a donation. Beyond the far edge, plus spread, or don't take it.

The break you chase is the one that fails

Breakout candles love a retrace. Plan the retest; don't buy the top of the spike.

The one-line version: draw fewer levels, wait for the reaction, put the stop where the idea is actually wrong. The full ebook is these three sentences, taught properly.
